Assessment

Clinical Helper provides a systematic approach to mental health assessment, guiding nurses through:

- Conducting comprehensive patient interviews
- Administering standardized assessment tools
- Gathering medical and psychiatric history
- Evaluating risk factors for violence and self-harm

- Identifying cultural and socioeconomic factors influencing mental health

Interventions

Clinical Helper outlines evidence-based interventions for managing mental health disorders, including:

- Cognitive-behavioral therapy (CBT)
- Dialectical behavior therapy (DBT)
- Mindfulness-based interventions
- Pharmacological interventions
- Crisis management and suicide prevention
- Case management and community support

Patient Care

Beyond interventions, Clinical Helper emphasizes holistic patient care, guiding nurses in:

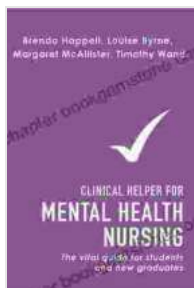

- Building therapeutic relationships
- Providing patient education
- Coordinating multidisciplinary care
- Addressing substance abuse and co-occurring disorders
- Supporting family members and caregivers
- Promoting patient advocacy and self-management

Specific Mental Health Disorders

Clinical Helper provides detailed guidance on assessing, intervening, and providing care for specific mental health disorders, including:

- Anxiety disorders (e.g., generalized anxiety disorder, panic disorder)
- Mood disorders (e.g., depression, bipolar disorder)
- Psychotic disorders (e.g., schizophrenia, schizoaffective disorder)
- Trauma-related disorders (e.g., post-traumatic stress disorder, dissociative disorders)
- Substance use disorders
- Personality disorders

Clinical Helper is a comprehensive resource that empowers mental health nurses to deliver compassionate and evidence-based care to patients with diverse mental health conditions. By providing a systematic framework for assessment, interventions, and patient care, Clinical Helper enhances the effectiveness and quality of nursing practice in mental health settings.
