Fawcett was born in 1867 in Devon, England. He joined the Royal Artillery in 1886 and served in India and Africa. In 1901, he was assigned to explore the border between Bolivia and Brazil. During this expedition, Fawcett became fascinated with the stories of a lost city in the Amazon rainforest.

He believed that this city, which he called "Z", was the remains of an ancient civilization that had flourished in the rainforest centuries ago.

In 1925, Fawcett led an expedition into the Amazon rainforest to find Z. He was accompanied by his son, Jack, and a friend, Raleigh Rimmell. The expedition was last seen on April 29, 1925, when they were crossing a river. They were never seen again.

There have been many theories about what happened to Fawcett and his companions. Some believe that they were killed by hostile Indians. Others believe that they died of disease or starvation. Still others believe that they found Z and were killed by its inhabitants.

The mystery of Fawcett's disappearance has never been solved. However, his story has continued to fascinate people around the world. He has been the subject of numerous books, articles, and films. And his disappearance remains one of the greatest unsolved mysteries of the 20th century.
